Portfolio

Profile Summary

- Aspiring Software Developer with expertise in PHP, Laravel, and AngularJS, focused on creating efficient web applications and managing MySQL databases.
- Proficient in object-oriented programming and troubleshooting, with a strong interest in collaborating in team environments and continuously learning new technologies.
- Proven proficiency in writing complex SQL queries to optimize database performance and ensure data integrity.
- Proficient in creating responsive web designs for enhanced user experiences.

Relevant Coursework

- Data Integrity
- Data Governance
- Generative AI
- Requirement Gathering
- Data Visualization
- Data Manipulation
- Data Mining
- Business Impact Analysis

Experience

Netaxis IT Solutions – Full Stack Developer Intern

JUN 24 – OCT 24

- Performed **data variance analysis** and debugged SQL queries to ensure 100% accuracy on data extraction from MySQL workbench.
- Applied advanced data cleaning and **data normalization techniques** to maintain data integrity and optimize data retrieval processes.
- Conducted ad-hoc analysis and designed customizable dashboards using Power BI.

Senchola Technology Solutions - Data Analyst Intern

Jul 23 – Oct 23

- Enhanced event planning strategies by leveraging advanced data transformation techniques with Power Query, coupled with demographic analyses utilizing Pivot Tables. Resulted in a **25% upsurge in attendee engagement**.
- Leveraged DAX measures to conduct exploratory data analysis on order cancellation rationales and average delivery durations.
- Demonstrated strong project management skills and collaborated effectively with teams to achieve organizational goals.

Projects

Twitter Clone / AngularJS ,PHP ,Laravel, SQL / [Live Dashboard](#) | [Git Repository](#)

Feb 24

- Developed a full-stack web application that mimics the core functionalities of Twitter, allowing users to create accounts, post tweets, follow or unfollow other users, and manage their profiles. This project was undertaken to understand how web applications work, with the intention of building a comprehensive full-stack application.

Amazon Clone / AngularJS ,PHP ,Laravel, SQL / [Live Dashboard](#) | [Git Repository](#)

Jan 24

- Created a comprehensive e-commerce platform that simulates the core features of Amazon, enabling users to explore a wide range of products, manage their shopping carts, and complete purchases. This project aimed to deepen my understanding of e-commerce architectures and full-stack development practices.

AtliQ Finance Reports / Excel, PivotTable, Dax/ [GitHub Repository](#)

Dec 23

- Created a 4-year P&L Report for Atliq Hardware in Excel, using Pivot Tables and DAX to analyze revenue. Automated data cleaning with Power Query, saving 4 hours, and implemented DAX measures for enhanced user experience, reducing data processing time by 50%. This enabled real-time insights for data-driven decision-making.

Technical Skills

Tools: VS Code, MySQL Workbench, Laravel CLI, Eclipse, Git CLI.

Languages: PHP, Java, Javascript , SQL.

Technologies/Frameworks: GitHub, Laravel, AngularJS, JQuery, Bootstrap.

Education

St Joseph College of Engineering

Jul 19 – May 23

Bachelor's in Electronics and Communication Engineering – CGPA : 7.35

Chennai, Tamil Nadu

Extracurricular / Certifications

- 5 star Proficiency in Writing SQL Queries–[View Credentials](#)
- Deep Understanding of Data Structures and Algorithm–[View Credentials](#)
